EXTINGUISHING MEDIA: Water, carbon dioxide, foam or dry chemical. Material does not burn without external flame. Use extinguishing media appropriate for the surrounding fire.

SPECIAL FIRE FIGHTING PROCEDURES: Does not burn without an external flame. Wear Positive Pressure Self-Contained Breathing Apparatus (SCBA) and clothing to protect from hydrogen fluoride gases which react with water to form hydrofluoric acid. Wear neoprene gloves when handling refuse from a fire.

UNUSUAL FIRE EXPLOSION HAZARDS: Hazardous gases/vapors produced in fire are hydrogen fluoride, carbonyl fluoride, carbon monoxide and low molecular weight fluorocarbons.

------------	---	------------------------------------	------------------------------	--	--

CONDITIONS TO AVOID: Avoid overheating this material. Fluoropolymers emit trace amounts of toxic fumes when heated above approximately 315°C (600°F); and significant amounts of toxic fumes above 400°C (750°F)

MATERIALS TO AVOID: None reasonably foreseeable.

HAZARDOUS DECOMPOSITION PRODUCTS: High heat or fire may create thermal decomposition products that could result in irritation of the eyes, skin, respiratory tract or "polymer fume fever". "Polymer fume fever" is a temporary flu-like illness with fever, chills, and sometimes cough, of approximately 24 hours duration. Thermal decomposition may release particulate and gaseous products including: hydrogen fluoride and carbonyl fluoride.
